Amendments to the Claims

This listing of claims will replace all prior versions, and listings, of claims in the application:

Listing of Claims

- 1.-68. (Cancelled)
- 69. (Currently amended) An individual single-walled carbon nanotube synthesized on a <u>flat</u> substrate, wherein the nanotube has a length of at least 1 mm from one end to an opposite end of the individual nanotube, <u>wherein the nanotube is one of a plurality of substantially aligned carbon nanotubes</u>, and wherein the nanotube is substantially isolated from other nanotubes.
- 70. (Previously presented) The nanotube of claim 69 wherein the nanotube has a length greater than 2000 microns.
- 71. (Previously presented) The nanotube of claim 69 wherein the nanotube has a length greater than 1 cm.
- 72. (Cancelled)
- 73. (Currently amended) The nanotube of claim 69 wherein the nanotube is made by a process comprising:

providing a catalyst on [[a]] the substrate; and directing a feeding gas in a predetermined direction over the catalyst such that the nanotube grows from the catalyst in the predetermined direction.

- 74. (Cancelled)
- 75.-76. (Cancelled)
- 77. (Previously presented) The nanotube of claim 69 wherein the nanotube comprises multiple metal electrodes on the nanotube.

- 78. (Previously presented) The nanotube of claim 69 further comprising multiple devices along the length of the nanotube.
- 79. (Currently amended) A system comprising an individual single-walled carbon nanotube and multiple transistor or diode devices along the length of the nanotube, wherein the nanotube has a length of at least 1 mm from one end to an opposite end of the individual nanotube, wherein the nanotube is one of a plurality of substantially aligned carbon nanotubes, wherein the nanotube is substantially parallel to a surface of a flat substrate, and wherein the nanotube is substantially isolated from other nanotubes.
- 80. (Previously presented) The system of claim 79 wherein the nanotube has a length of at least 2000 microns.
- 81. (Cancelled)
- 82. (Previously presented) The system of claim 79 wherein the nanotube has a length of greater than 1 cm.
- 83.-88. (Cancelled)
- 89. (Currently amended) The system of claim 79 further comprising [[a]] the substrate which supports at least one end of the nanotube.
- 90. (Previously presented) The system of claim 79 further comprising a metal catalyst nanoparticle in contact with at least one end of the nanotube.
- 91. (Previously presented) The nanotube of claim 69 wherein the substrate supports at least one end of the nanotube.
- 92. (Previously presented) The nanotube of claim 69 further comprising a metal catalyst nanoparticle in contact with at least one end of the nanotube.
- 93. (Cancelled)
- 94. (Cancelled)

- 95. (Previously presented) The nanotube of claim 69 wherein the nanotube has a length of 1 mm to 1 cm from one end to an opposite end of the individual nanotube.
- 96. (Previously presented) The system of claim 79 wherein the nanotube has a length of 1 mm to 1 cm from one end to an opposite end of the individual nanotube.
